THE SAFER CLEANING SOLUTION

From *Spraying Systems Co.*

**PRODUCE CLEANERS & SANITIZERS  
IN YOUR HATCHERY WITH KLARION™  
SAVE 30% OR MORE ON CHEMICALS  
& IMPROVE WORKER SAFETY**

HIGHLY EFFECTIVE | SAFER | ENVIRONMENTALLY RESPONSIBLE

# DRAMATICALLY REDUCE CHEMICAL COSTS WITHOUT COMPROMISING CLEANING EFFECTIVENESS

The new Klarion™ system produces a powerful cleaner and disinfectant on demand in your hatchery. These solutions are produced in ready-to-use concentrations and eliminate the need to purchase, store and dilute chemicals. Use Klarion solutions to clean and disinfect setters, hatchers, tray washing machines and other equipment.

## THERE'S NO CAPITAL EQUIPMENT TO PURCHASE

Simply produce the solutions as needed and pay based on the volume produced. Klarion users typically see significant savings when compared to use of traditional chemicals.

## IMPROVE WORKER SAFETY

Klarion solutions are powerful and effective. The Klarion sanitizer is twice as effective as bleach at the same concentration. The cleaner and sanitizer are fragrance-free and eye and skin safe. The risk of burns from hazardous chemicals is eliminated.

## HOW KLARION™ IMPROVES CLEANING & SANITATION

With countless varieties of pathogens posing a threat to the health of your chickens, it's vital to keep your hatchery equipment clean and disinfected. Klarion solutions remove feathers, egg shells, droppings, other debris and long-term build up from other cleaners while disinfecting equipment without leaving a residue.

## ADVANCE YOUR SUSTAINABILITY INITIATIVES

The Klarion system contributes to your hatchery's green efforts in a number of ways. The low level of active chemicals in the solutions minimizes their impact on the environment. Both solutions are drain and disposal safe. In addition, pollution associated with the delivery and removal of chemicals from your hatchery is eliminated.

## EASY-TO-USE & EASY-TO-MAINTAIN

The Klarion System only requires salt, soft water, electricity and access to a drain to operate. It requires one daily maintenance check of the brine tank to see if additional salt pellets are required. The storage volume of the system can be scaled to your daily usage to prevent shortages.

The simple design of the Klarion system ensures reliable operation. Should a problem occur, the system has integrated error monitoring and telematics to ensure quick resolution. You can clean and disinfect with confidence knowing that Klarion provides on-demand, remote help, seven days a week.

---

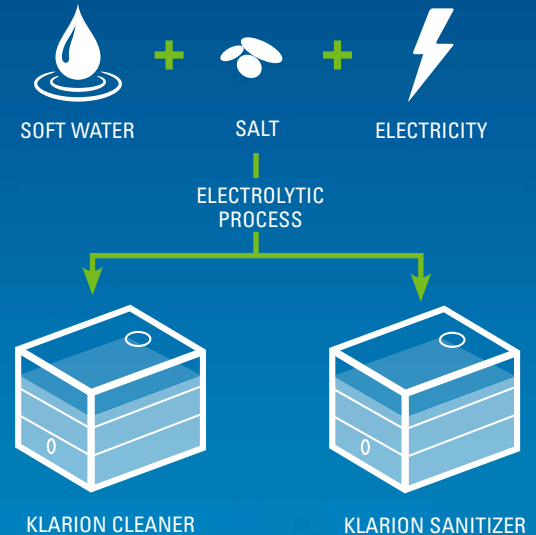

"The solutions produced by Klarion are a lot safer than the chemicals we had been using. Once they have been applied several times, long-term build-up dissipates and cleaning becomes easier. Plus, we've found that a cleaner environment has helped with chick livability."

– Hatchery Manager of a leading poultry producer

---

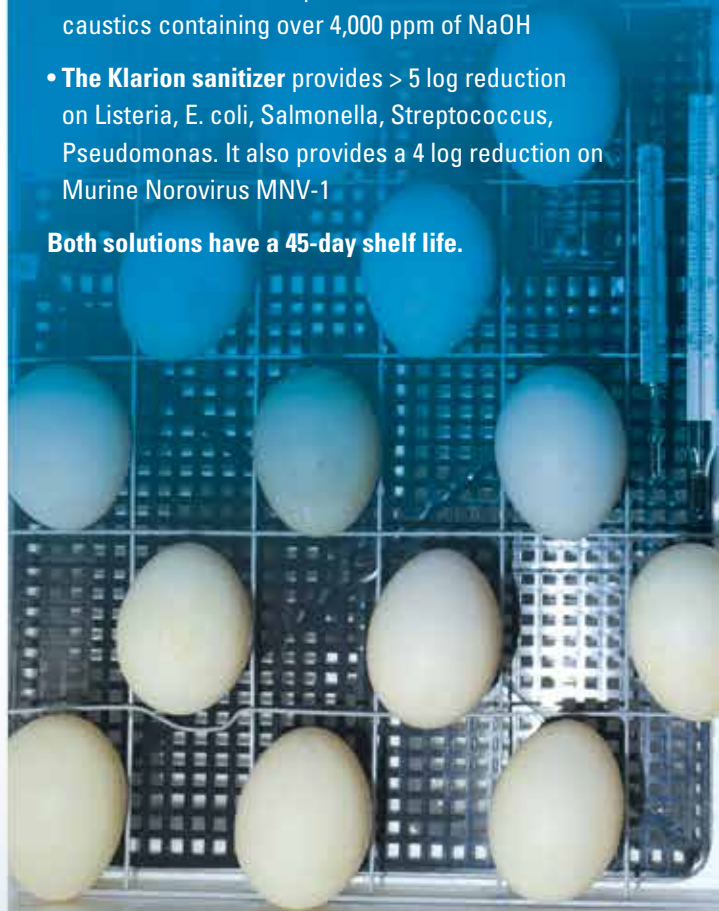

## HOW DOES KLARION WORK?

The Klarion System uses reliable, proven electrochemical cell technology. Using just high purity salt, soft water and electricity, the Klarion system produces a sodium hydroxide cleaner and hypochlorous acid sanitizer.

- **The Klarion cleaner** replaces chemical caustics containing over 4,000 ppm of NaOH
- **The Klarion sanitizer** provides > 5 log reduction on Listeria, E. coli, Salmonella, Streptococcus, Pseudomonas. It also provides a 4 log reduction on Murine Norovirus MNV-1

**Both solutions have a 45-day shelf life.**

“Your people will fall in love with the Klarion system and you’ll save money. I highly recommend that every hatchery carefully consider this system.”

– Hatchery Manager of a leading poultry producer

## SEE HOW KLARION CAN WORK FOR YOUR HATCHERY WITH A FREE, ON-SITE COST-SAVINGS ANALYSIS

Just how much money can the Klarion system save your hatchery? Contact us to schedule a complimentary, on-site, cost-savings analysis and find out. Our experts will visit your facility, evaluate your equipment and cleaning requirements and calculate the savings you may experience by using the Klarion system.
