# CHANGE THE WAY YOU BUY AND USE CLEANING CHEMICALS

## INTRODUCING THE KLARION™ SYSTEM

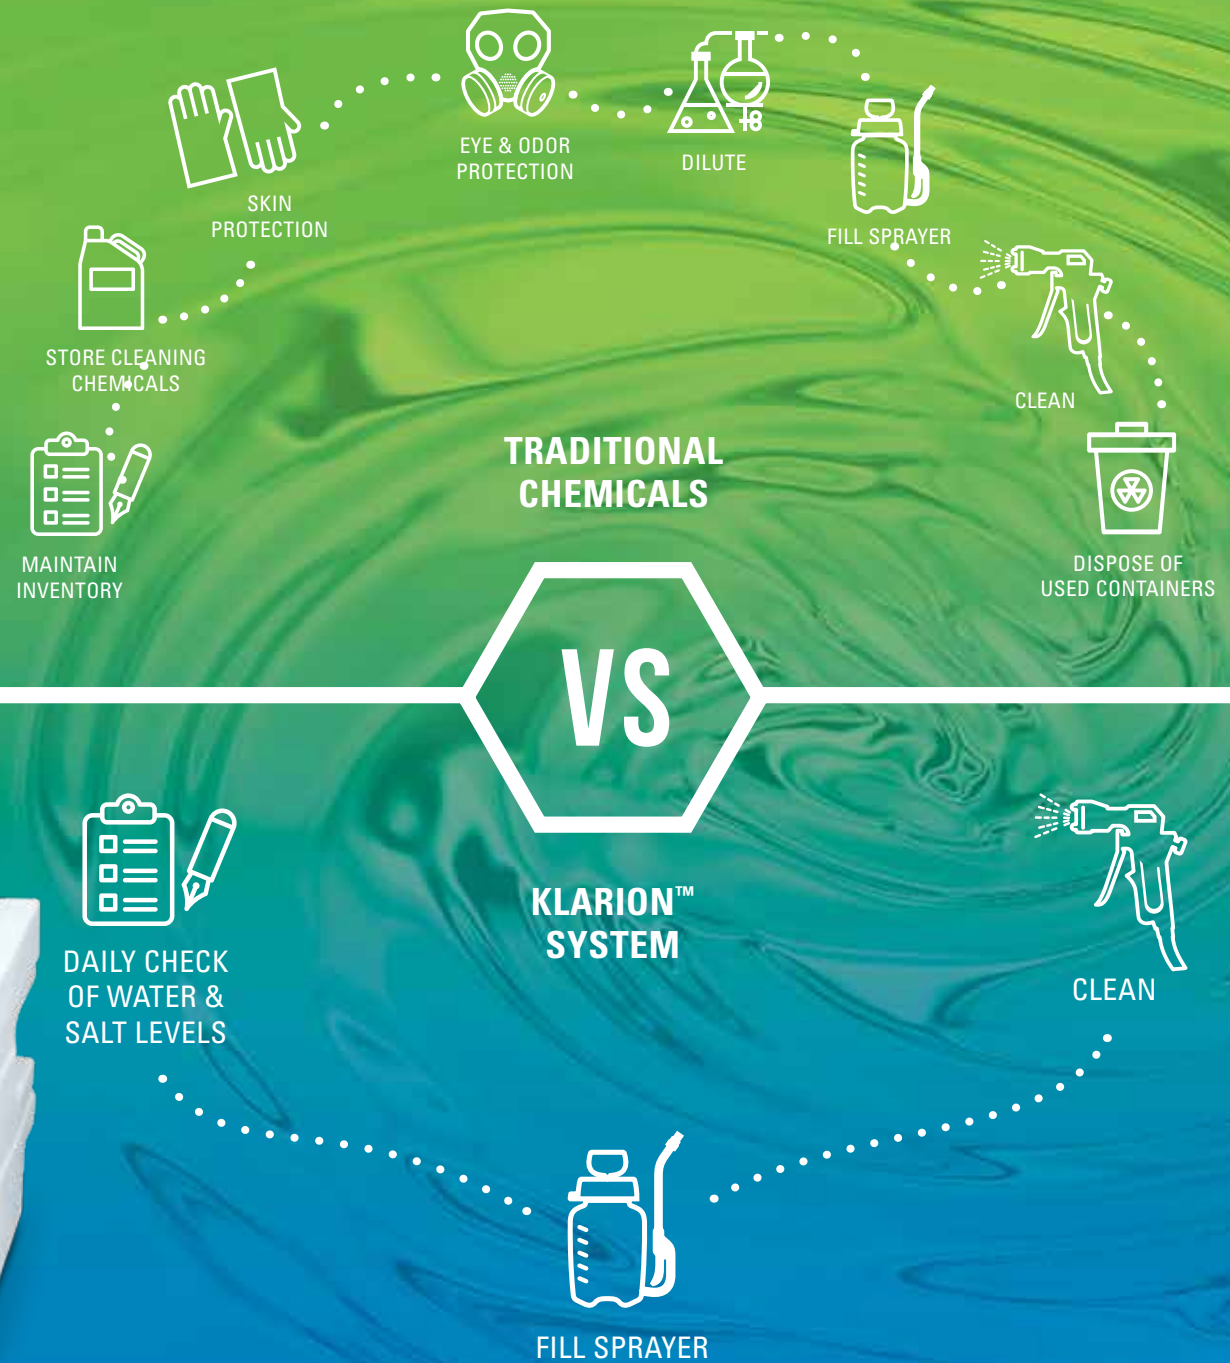

The Klarion system uses simple, dependable electro-chemical activation technology to produce a cleaner and sanitizer. The solutions are produced in ready-to-use concentrations and contain no salt making them safe for use on metal equipment.

There are several compelling reasons to re-evaluate your strategy when it comes to chemical use for cleaning in your facility. That's because the new Klarion system offers a better solution to your current approach.

### WITH THE KLARION SYSTEM, YOU CAN:

- Reduce how much you spend on cleaning chemicals
- Improve worker safety
- Reduce the time spent on cleaning

**SAVE 30% OR MORE VERSUS TRADITIONAL CHEMICALS... AND THAT IS JUST THE BEGINNING.**

# ONCE YOU COMPARE YOUR OPTIONS... THE CHOICE IS EASY.

## ONLY PAY FOR WHAT YOU USE

- No capital equipment purchase required
- Pay only for the volume of solutions produced

## SAVE WITHOUT SACRIFICING CLEANING EFFECTIVENESS

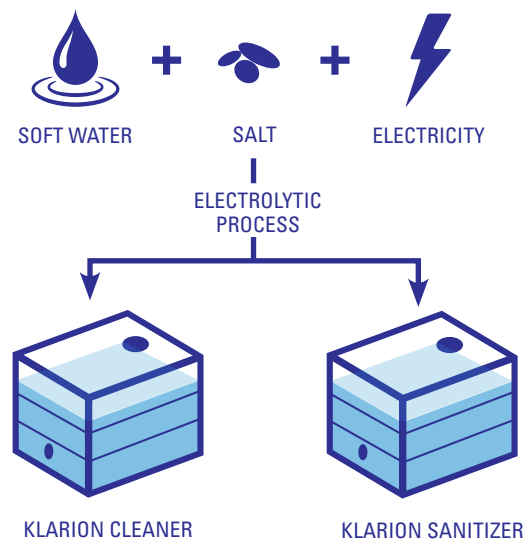

- The solutions produced clean just as well as traditional chemicals – if not better

## MANY KLARION SYSTEM USERS REPORT HAPPIER, HEALTHIER AND MORE PRODUCTIVE WORKERS

- Never order, store or dilute toxic concentrated chemicals again
- Solutions are fragrance-free and non-irritating to eyes and skin
- Improve worker safety by eliminating:
  - The need for protective gear when cleaning
  - The risk of chemical burns
  - Worker's comp claims due to use of concentrated toxic chemicals
- Improve productivity
  - Allow your workers to spend more time cleaning and less time mixing chemicals and getting in and out of safety gear
- Advance your sustainability initiatives
  - The solutions are drain and disposal safe. Plus, the pollution associated with the delivery/removal of chemicals and the disposal of chemical containers is eliminated

## HERE'S HOW IT WORKS

- The Klarion system uses electro-chemical activation (ECA) technology to produce a powerful cleaner and sanitizer using just high purity salt, water and electricity
- The compact system is installed in your facility
- Solutions are produced on-demand in ready-to-use concentrations
- The Klarion cleaner replaces concentrated chemical caustics in your facility
- The Klarion sanitizer is as effective as twice the concentration of bleach. Example: 200 ppm of Klarion sanitizer does the work of 400 ppm of bleach. See [www.klarion.com/certifications](http://www.klarion.com/certifications) for additional information on efficacy
- Both solutions have a 30-day shelf life
- There is no capital expenditure; simply pay based on the volume produced

## SYSTEM OPERATION

- Just salt, water, electricity and access to a drain are required
- Quick daily check of cleaner and sanitizer pH levels and the salt level in the brine tank
- In the unlikely event of a problem, integrated error monitoring and telematics ensure quick, 24/7 resolution

## IT'S THAT SIMPLE

## KLARION™ ECA SOLUTIONS ARE IDEAL FOR CLEANING:

### HATCHERIES

### DAIRIES

### BAKERIES

### TANKER TRUCK CLEANING FACILITIES

### FOOD AND BEVERAGE PROCESSING FACILITIES

Klarion is part of Spraying Systems Co., the world leader in spray technology. For more than 80 years, Spraying System Co. has been helping manufacturers and processors optimize cleaning, coating and cooling operations using spray nozzles, tank cleaners and automated systems. Our local spray experts serve bakeries, dairies, beverage/bottling plants and other food processing facilities on a daily basis. Now, in addition to helping customers determine the best way to apply cleaning agents, our local experts can provide new Klarion technology that allows processors to produce highly effective, safer and more cost-effective cleaning solutions on site and on demand.
